

# Sultan Ali Bashier

Full Stack .NET Developer (Angular)

✉ sultan.alhejeery@gmail.com ☎ (+2)01111818357 📍 Cairo, Egypt 🌐 linkedin.com/in/sultan-ali18  
🐙 github.com/SultanBashier

## SUMMARY

**Full Stack Developer** specialized in **Angular, .NET/C#, and SQL**, with a proven ability to architect and deliver end-to-end web solutions that are fast, scalable, and built to last. I don't just write code — I engineer experiences, turning complex requirements into clean, intuitive, and high-performing applications. My approach combines technical depth with a sharp problem-solving mindset, allowing me to tackle challenges across the full stack with confidence and precision. Actively seeking a junior full-stack role to apply hands-on experience gained through intensive training at **ITI** and real-world projects.

## EDUCATION

### Bachelor's Degree in Computer Science and Information

South Valley University, Qena

09/2020 – 06/2024

Qena, Egypt

- Strong foundation in software engineering, algorithms, data structures, Networks, Operating Systems, and databases.

## SKILLS

### Languages

Proficient in C#, TypeScript, MS SQL

### Core CS

Data Structures, Algorithms, Operating Systems, Computer Networks, Design Patterns

### Back-End Development

ASP.NET Core MVC, Web API, Entity Framework Core, LINQ,Dapper,ADO.NET

### Front-End

Angular, TypeScript, RxJS, HTML5, CSS3, JavaScript, Bootstrap

### Authentication & Security

JWT, ASP.NET Core Identity, Role-Based Authorization, Claims-Based Authentication

### Databases

Microsoft SQL Server (Database Design, Indexing, Stored Procedures, Query Optimization)

### Architecture & Principles

OOP, SOLID Principles, Clean Architecture, Onion Architecture, N-Tier Architecture, RESTful API Design

### Tools & Collaboration

Git, GitHub, Visual Studio, VS Code, Agile Methodologies, Code Reviews

### Competencies

Strong problem-solving, teamwork, time management, and analytical thinking

## LANGUAGE

### Arabic

Native

### English

Professional working proficiency

## CERTIFICATION&TRAINING

---

### Full Stack .NET & Angular Track Information Technology Institute (ITI) — Scholarship

01/2026 – 06/2026  
Qena

Completed an intensive full-stack program at a leading tech institute in Egypt ,Built real-world applications using Angular, TypeScript, RxJS, ASP.NET Core Web API, and SQL Server,Applied Clean Architecture, SOLID principles, and Design Patterns in scalable systems ,Developed responsive frontends and robust RESTful APIs using Entity Framework Core ,Strengthened problem-solving skills and adopted production-level development practices

### Self-Taught Back-End Developer .NET Track

03/2025 – 07/2025

#### Self-Taught

- independently studied the ITI curriculum, mastering C#, ASP.NET MVC, Web API, Entity Framework, SQL Server, Networks, and Operating Systems.

### .Net Backend Development Track

07/2024 – 01/2025

#### Route Academy

- Covered advanced topics including C#, OOP, Data Structures & Algorithms, SQL Server, ASP.NET Core MVC, Web API, Entity Framework Core, LINQ, Authentication & Authorization, Clean Architecture, Design Patterns, and SignalR.

## PROJECTS

---

### Restaurant Management System (API)

- Architected a full-featured restaurant management API following **Clean Architecture** and **CQRS** pattern with **MediatR**, enabling clear separation of concerns and scalable command/query handling.
- Implemented **JWT authentication with Refresh Tokens** and **Role-Based Authorization** to secure all endpoints.
- Applied **Hybrid Caching with Redis** to optimize frequently accessed data and reduce database load.
- Used **Fluent Validation** and the **Result Pattern** to ensure robust error handling and clean API responses.
- Technologies:** ASP.NET Core Web API, EF Core, SQL Server, Clean Architecture, CQRS, MediatR, Redis, JWT, Swagger.

### E-Commerce Web Project: Book Shop (MVC)

- Built a full-featured online bookshop supporting product browsing, cart management, and order processing using **ASP.NET Core 8 MVC** with **N-Tier Architecture**.
- Integrated **Stripe Payment Gateway** for secure online transactions.
- Implemented **ASP.NET Identity** with **JWT**, supporting **Microsoft and Google OAuth** sign-in.
- Designed a fully responsive UI using **HTML, CSS, Bootstrap, and JavaScript**.
- Technologies:** ASP.NET Core 8, EF Core, SQL Server, ASP.NET Identity, Stripe, Bootstrap, JavaScript.
